

JORGE BAYUELO

Dallas, Texas | (470) 647-7959 | jorgebayuelontech@gmail.com

IT Support and Systems Engineer with 5+ years of experience providing hands-on end-user support, systems administration, and infrastructure management across Windows, macOS, and Linux environments. Skilled in troubleshooting, endpoint management, and automation using PowerShell and scripting tools. Experienced in Active Directory, Microsoft 365, and ITIL-based service delivery. Passionate about creating secure, efficient, and reliable technology environments that improve productivity and reduce downtime for users.

CORE COMPETENCIES

IT Help Desk & Desktop Support | Active Directory & Entra ID | Microsoft 365 Administration | Windows/macOS/Linux | Intune & SCCM | PowerShell/Bash Automation | Endpoint Security & Compliance | Network Troubleshooting | Exchange Online | VPN & Remote Desktop | Hardware Deployment & Imaging | User Onboarding & Offboarding | Cloud Platforms (AWS, Azure) | VMware | ITIL Service Management

PROFESSIONAL EXPERIENCE

ITTIQ

Sep 2023 – Present

IT Support & End User Support Engineer

- Provide Tier 1–2 end-user support for 150+ employees, resolving hardware, software, and network issues within SLA targets.
- Administer Microsoft Entra ID, Exchange Online, and Microsoft 365 accounts, managing MFA and access control policies.
- Manage endpoint configuration and patching through Intune and SCCM, ensuring compliance and security.
- Develop PowerShell scripts to automate onboarding, mailbox provisioning, and reporting tasks, improving operational efficiency by 30%.
- Supported virtualized environments by assisting with VMware-based virtual machines, including basic monitoring, troubleshooting access issues, and coordinating VM provisioning and maintenance tasks.

ICF

Jul 2021 – Aug 2023

IT Support & End User Support Engineer

- Delivered Tier 1–2 technical support for 200+ users across Windows, macOS, and Linux systems, maintaining a 95% SLA resolution rate.
- Managed user accounts, permissions, and security groups in Active Directory and Exchange Online.
- Deployed updates and software through Intune and SCCM, reducing system vulnerabilities by 40%.
- Automated routine tasks using PowerShell and Bash, cutting manual effort by 60%.
- Assisted with support and troubleshooting of VMware virtual machines used for internal systems and applications, escalating performance and availability issues as needed.

Synergy Tech Consulting, LLC

Mar 2019 – Jun 2021

IT Support & Infrastructure Specialist

- Supported and maintained 50+ Linux and Windows servers, achieving 99.5% uptime.
- Managed IT assets, imaging new devices, and handling upgrades, replacements, and repairs.
- Configured firewall rules, DHCP/DNS, and VLANs for secure network connectivity.
- Created internal documentation for configurations, backup procedures, and troubleshooting workflows.

- Supported VMware virtualization environments by managing and maintaining Windows and Linux virtual machines, assisting with deployments, snapshots, and uptime monitoring.
