SOC ANALYST L1 | COMPTIA SECURITY+ CERTIFIED

CompTIA Security+ certified IT professional with hands on experience supporting enterprise endpoints and troubleshooting complex system issues across Windows environments. Experienced in analyzing SCCM deployment logs, Windows system events, and diagnostic outputs to investigate system failures and identify root causes. Skilled in Active Directory administration, PowerShell scripting, and enterprise device management using Microsoft Intune and SCCM. Strong foundation in security operations, log analysis, and incident investigation within enterprise IT environments.

EDUCATION

Audiovisual and Multimedia - University of Bogota Jorge Tadeo Lozano

CERTIFICATIONS

CompTIA Security+ CE
CompTIA A+
AWS Certified Cloud Practitioner
Google IT Support Professional Certificate
CompTIA CySA+ (InProgress)

TECHNICAL SKILLS

Security Operations: Log Analysis | Security Event Monitoring | Incident Investigation | Threat Detection Concepts | SIEM Fundamentals

Endpoint & Systems Management: Microsoft Intune | SCCM (Endpoint Configuration Manager) | BitLocker Encryption | Device Compliance Monitoring | Windows Administration | Linux Administration | Device Imaging & Deployment

Identity & Access Management: Active Directory | Microsoft Entra ID | MFA Administration | User & Device Lifecycle Management

Security Foundations: Endpoint Security Controls | Security+ Security Principles

Automation & Scripting: PowerShell | Bash

Networking & Diagnostics: TCP/IP | DNS | VPN | Network Troubleshooting | Ping | IPConfig | NSLookup | DSRGCmd

PROFESSIONAL EXPERIENCE

Dallas County, Dallas, TX
Desktop Support Technician

FEB 2026 - PRESENT

- Investigated critical Windows upgrade rollback failures by analyzing SCCM deployment logs and Windows system events, implementing PowerShell remediation scripts that restored endpoint readiness and achieved a 95% successful Windows 11 deployment rate.
- Managed enterprise endpoints across 500+ devices through Microsoft SCCM and Intune, ensuring proper configuration and compliance with organizational security policies.
- Maintained Active Directory integrity during endpoint reimaging operations by verifying organizational units and removing stale computer objects to prevent domain join conflicts and directory issues.
- Diagnosed endpoint connectivity and domain authentication issues using diagnostic tools including ping, ipconfig, nslookup, and dsregcmd, while enforcing BitLocker encryption policies to maintain secure device configurations.

Polycount, Remote

NOV 2022 - AUG 2024

Unreal Engine Technical Artist

- Led technical evaluation and implementation of new tools for the production pipeline, researching capabilities, building documentation, and training artists to standardize adoption across the team.
- Developed and deployed advanced shaders and visual rendering systems, achieving a 30% improvement in performance through systematic optimization and technical troubleshooting of complex pipelines.
- Collaborated with designers and programmers across functional teams to ensure seamless integration of 3D assets into game environments, maintaining quality standards across the full development lifecycle.
- Coordinated cross departmental efforts for Hugo Boss online platform integration, ensuring 3D asset compatibility with ecommerce platform requirements and contributing to an enhanced user interface and shopping experience.

DICON S.A.S, Bogota, Colombia

APR 2016 - MAY 2021

3D Artist

- Produced detailed 3D models and visualizations for 50 residential and commercial projects, managing concurrent deliverables and achieving a 40% increase in client approval rates.
- Translated complex architectural and design concepts into accurate visual representations in collaboration with architects and interior designers, improving the design approval process by 25%.
- Maintained a 98% error free delivery rate through rigorous quality assurance reviews across all project visualizations and deliverables.
- Created architectural visualizations using 3D Studio Max and V-Ray, managing file organization and asset delivery across multiple concurrent projects.
